

The school is located on the serene acres of "Range Village." The campus includes a Main House and cottages for primary and elementary classes, extended day club programs, and special event activities. Adjacent to the elementary playground is an edible garden lovingly tended by the children. An outdoor science center including a pond, root viewers, and observation centers is also on the grounds. There are two shady playgrounds complete with swings, trapezes, slides, tether balls, a four-square court, tricycles, and climbing equipment, as well as many natural resources for play.
